Bosch 5 Ton Heat Pump Inverter System Premium Connected Series 19 SEER, 18 SEER2 BOVS-60HDN1-M20G, BVA-60WN1-M20

The Bosch true inverter Premium Connected Series heat pump system delivers maximum efficiency while keeping sound levels as low as 50dBA.
The outdoor compressor & motor can freely ramp up & down per demand, offering operating levels from 25-110% capacity.
Your new BOVB-60HDN1-M20G premium connected 8733951606 condenser paired with BVA60WN1-M20 air handler offer superior reliability in comfort by operating at lower speeds and lower temperature differentials. Bosch's Premium Connected Series is included with every Bosch system installed in a residential application. Also with proper registration of your System, Bosch includes a 90 Day Limited Labor Warranty!
This can all be achieved while using any 2 Heat 1 Cool thermostat or better.

Premium Connected Advantage:
The premium connected series features connectivity to Bosch's in-app warranty registration, installation, and troubleshooting, the IDS Premium Connected provides an interactive Internet of Things (IoT) platform for contractors and homeowners.
Its connected features include remote monitoring and access to Easyair App. Get notified on system faults right away!

Why Choose A Bosch IDS System

Quiet Comfort Achieved
The Bosch Inverter Ducted Split system is one of the quietest air-to-air heat pumps on the market. Through the use of a variable speed compressor and fan motor in the outdoor condensing exterior placement - the system can deliver outdoor sound levels as low as 58 dBA - which is superior to any standard system on the market.

Consume Only the Energy You Need
Modulating inverter systems deliver only the amount of hot or cool air needed to achieve the desired temperature – no more, no less. Bosch's Inverter Ducted Split system can provide you with maximum comfort levels at a minimum cost.

Fast Response
It takes traditional systems a long time to reach the homeowner's desired temperature, while the bounded inverter system can reach the desired temperature with proactive and more efficient heating and cooling.

Consistent Room Temperature
Conventional heat pumps frequently cycle on and off, causing temperature fluctuations. The continuously-variable-speed heat pumps are able to run at all speeds, providing consistent room temperatures, even when the temperature outdoors dips below freezing.

Energy Use Is Even and Steady
The frequent on and off of traditional units creates an inrush current surge which uses more energy and causes unneeded wear and tear on your system. The Bosch inverter system smoothly ramps up operation, avoiding spikes in energy use and protecting the system's lifecycle.

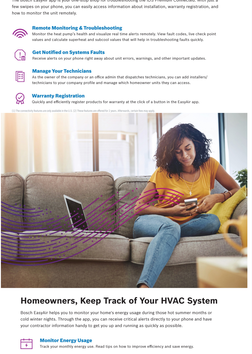
Residential Limited Warranty[8]
With the residential limited warranty, you receive peace-of-mind knowing you will receive up to 10 years protection on your Bosch Premium Connected Series equipment.

Premium Connected HVAC Solution[1,2,3]
Featuring wireless connectivity as well as in-app warranty registration, installation, and troubleshooting, the IDS Premium Connected provides an interactive Internet of Things (IoT) platform for contractors and homeowners. Its connected features include:

Remote Monitoring
Allows contractors and homeowners to monitor data for their unit even without a communicating thermostat.

Bosch Easyair App
Contractors can easily access the information they need to conduct on-site installation, troubleshooting, and warranty registration.

Scan QR code to download the Easyair App



Contractor Troubleshooting Made Easy

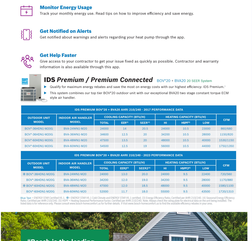
The Bosch Easyair app is your one-stop shop for troubleshooting the IDS Premium Connected. With just a few swipes on your phone, you can easily access information about installation, warranty registration, and how to monitor the unit remotely.

Remote Monitoring & Troubleshooting
Monitor the heat pump's health and visualize real-time alerts remotely. View fault codes, live check point values and calculate superheat and subcool values that will help in troubleshooting faults quickly.

Get Notified on System Faults
Receive alerts on your phone right away about unit errors, warnings, and other important updates.

Manage Your Technicians
As the owner of the company or an office admin that dispatches technicians, you can add installers/ technicians to your company profile and manage which homeowner units they can access.

Warranty Registration
Quickly and efficiently register products for warranty at the click of a button in the Easyair app.



Homeowners, Keep Track of Your HVAC System

Bosch Easyair helps you to monitor your home's energy usage during those hot summer months or cold winter nights. Through the app, you can receive critical alerts directly to your phone and have your contractor information handy to get you up and running as quickly as possible.

Monitor Energy Usage
Track your monthly energy use. Read tips on how to improve efficiency and save energy.

Get Notified on Alerts
Get notified about warnings and alerts regarding your heat pump through the app.

Get Help Faster
Give access to your contractor to get your issue fixed as quickly as possible. Contractor and warranty information is also available through this app.

IDS *Premium / Premium Connected* 60/72K + BVA20 20 SEER System

- Quality for maximum energy rebates and save the most in energy costs with our highest efficiency. IEL Premium.
- This system combines our top-tier BOVS7 Outdoor unit with our equivalent-to-Premium line range compact tonnage ECM style air handlers.
