Local Market Overview

Compton remains one of the most supply-constrained industrial submarkets in Los Angeles County, driven by its central location and proximity to the Ports of Los Angeles and Long Beach. Limited developable land, combined with heavy manufacturing zoning and strong logistics infrastructure, continues to support long-term demand from industrial users and investors.

The market benefits from immediate access to major transportation corridors including the 91, 710, 105, and 110 freeways, making it a strategic hub for manufacturing, distribution, and last-mile operations. Vacancy remains historically tight relative to broader LA County, reinforcing pricing stability even amid shifting capital markets.

As institutional capital targets infill locations with functional zoning and redevelopment potential, Compton stands out for its industrial depth, workforce access, and replacement-cost barriers. These fundamentals continue to position the market favorably for both near-term utilization and long-term value growth.

Population	1-Mile	3-Mile	5-Mile
Five-Year Projection	40,896	272,588	752,837
Current Year Estimate	42,690	284,376	784,837

2020 Census	11,447	76,672	199,300
Income	1-Mile	3-Mile	5-Mile
Average Household Income	\$70,473	\$76,514	\$79,328

LOS ANGELES, CA - MSA

Greater Los Angeles stands as a dynamic economic and cultural hub, with an estimated 2024 population of over 9,757,000—up more than 26,000 from 2023—driven by international migration and a recovering job market attracting younger, urban-oriented professionals. Los Angeles' continued draw as a global gateway underscores its appeal for long-term residence and investment.

The metro shows significant economic scale, with a 2024 median household income of about \$91,000, rising steadily on the strength of high-wage industries like tech, healthcare, and entertainment. While housing affordability is a challenge, high incomes and wealth concentration sustain consumer spending and housing demand, making the diverse market resilient for developers and investors.

Total Population

TRANSPORTATION

The Ports of Los Angeles and Long Beach form the largest container port complex in the Western Hemisphere, processing over 10 million TEUs in 2024, including 743,417 containers in the latest monthly count. Serving as the main entry point for goods from Asia—especially China, at about 40% of total volume—the ports anchor one of the nation's largest logistics and warehousing hubs, supporting over 1 million regional jobs.

Once goods arrive, they move quickly across North America via extensive air, rail, and road networks. Los Angeles International Airport, one of the world's busiest, handled over 75 million passengers and 2.7 million metric tons of cargo in 2023, ranking among the top five U.S. freight airports.

Port Cargo Volume
10.3 million TEUs

Airport Economic Impact
\$126.6 Billion

Logistics Employment
205,700

Annual Ridership
76.59 million

The freeway system—including I-5, I-10, I-405, and US-101—links Southern California to major West Coast and national corridors, supporting both commuting and long-haul trucking. Public transit is expanding, with the Los Angeles Metro operating over 100 miles of rail lines and upcoming projects like the D Line Extension and Inglewood Transit Connector, while Metrolink connects the city to surrounding counties, boosting regional workforce mobility.
