SterlingCRE
ADVISORS

SterlingCRE Advisors is pleased to present a rare opportunity for industrial condominium ownership in Missoula’s expanding commercial corridor. Located just minutes from the Interstate 90 interchange, West Ridge Industrial Park offers strategic access to regional transportation routes, the North Reserve commercial district, and Missoula International Airport.

These modern industrial condominium units are purpose-built for owner-operators seeking long-term control, operational efficiency, and equity growth. Designed with functional layouts, grade-level loading, ample shared parking, and flexible warehouse-to-office configurations, the project supports a wide range of light industrial, logistics, service, and trade uses. The site will be fully paved, providing improved circulation, durability, and ease of access for vehicles and equipment.

Missoula’s industrial market remains supply-constrained, with rising construction costs and increasing demand for quality industrial product. Ownership at Futurity Drive allows businesses to stabilize occupancy costs, hedge against rising lease rates, and secure a permanent footprint in one of Western Montana’s most active industrial corridors.

With limited units available and completion scheduled for July 2026, this offering represents a timely opportunity to own in a location positioned for long-term growth.

Limiting Conditions Study outcomes are based on our analysis of the information available to us from our research as of the date of report creation. As such, we assume the client has offered correct and reliable information. Further, we assume the client has informed us about any issues that would affect project feasibility. The study is based on current and expected trends of the economy and real estate market. However, economic conditions change, as do real estate markets. As such, we insist that clients continuously track the economy and real estate market. We strongly encourage clients to revisit findings from the study continuously and to revisit key project assumptions periodically to ensure they are still justified. Given the changing market conditions and potential for shifting consumer preferences, projected and actual results will likely differ. Market conditions and projections frequently are different than expected. We do not express any form of assurance on the achievability of any pricing or absorption estimates of reasonableness of the underlying assumptions. The study assumes "normal" real estate market conditions and not conditions of an "up" or "down" market. Economic, employment, population & household growth and consumer confidence are assumed to occur more or less in accordance with current expectations. There are no assurances about the ability to secure needed project entitlements; in the cost of development or construction; in tax laws that favor or disfavor real estate markets; or in the availability and/or cost of capital and mortgage financing for real estate developers, owners and buyers. If any major change in market conditions occurs, this study analysis should be updated, with the conclusions and recommendations summarized herein reviewed and reevaluated. We have no responsibility to update our analysis for events and circumstances occurring after the date of our report. Clients are advised to independently verify the accuracy and completeness of all summaries and information contained herein, to consult with independent legal and financial advisors, and carefully investigate the economics of this development.
