WARM MINERAL SPRINGS

WARM MINERAL SPRINGS

Warm Mineral Springs Park is home to Florida's only naturally occurring warm mineral spring, maintaining a constant temperature of approximately 85°F year-round. Renowned for its mineral-rich waters and purported therapeutic benefits, the spring is one of the most significant natural and archaeological sites in North America and is listed on the National Register of Historic Places. The destination attracts more than 150,000 visitors annually from around the world, making it one of Southwest Florida's premier tourism and wellness attractions.

To preserve and enhance this iconic destination, the City of North Port has launched a \$16.7 million rehabilitation project that will restore the park's three historic buildings, including the Admission Building, Spa Building, and Cyclorama, while adding upgraded utilities, enhanced parking, new landscaping, improved accessibility, floodproofing, and expanded visitor amenities. Scheduled for completion in late 2027, the revitalized park is expected to strengthening tourism, support local businesses, and reinforcing Warm Mineral Springs Park as one of the region's most distinctive recreational and economic assets.
