ESG

A SUSTAINABLE APPROACH

We believe in a sustainable approach to office space.

This means rather than demolishing existing buildings, we re-purpose them into design-led, quality workspaces for the modern occupier.

By doing this, we significantly reduce our carbon emissions and negative impact on the environment, whilst providing sought-after buildings that operate efficiently. The Triangle is no exception.

Gas fired boilers have been replaced with all-electric VRF air conditioning systems, our lighting is fully LED and as keen advocates of walking, running and cycling, we have upgraded the end of journey facilities with new bicycle parking, showers, drying room and towel service.

Wherever possible, we upcycle fit outs by retaining and reusing quality materials. This approach typically uses one fifth of the total embodied carbon of a traditional CAT A or CAT B fit out.

As a family-owned organisation, Romulus are committed to doing what we can to find and support sustainable solutions.

Buildings are supplied with 100% renewable electricity

Zero to landfill policy; non-recyclable waste is sent to an 'Energy from Waste' facility

Upcycling building fit outs where possible, significantly reducing embodied carbon emissions

Replacing older windows with high performance glazing

Targeting an 80% recycle rate across multiple waste streams

Endeavouring to procure UK manufactured materials

Rooftop gardens and outdoor spaces designed into schemes

Beehives and insect houses installed to aid local biodiversity

Electric charging points provided in the majority of our car parks
