ONEFIBRE

OneFibre is a super-fast, highly reliable, dedicated fibre internet that comes ready installed in your building meaning you'll be able to enjoy instant connectivity within as little as 24 hours of signing your lease. That means no lead times or lengthy wayleave agreements!

With standard internet providers offering lead times of up to 90 days before your connection goes live, the average relocation means a lot of frustrated staff, unhappy customers and lost revenue.

Unlike Fibre Broadband services, OneFibre provides a dedicated fibre line into your office. You don't share the connection with anyone else and you choose the exact bandwidth you require based on your business needs.

KEY BENEFITS

Cost effective

You'll be able to choose your bandwidth (50MB to 1GB) according to your organisation's specific needs, giving you all the perks of high-speed internet without having to pay for stuff you don't need.

Consistent

As a dedicated connection OneFibre speeds are symmetric, so upload and download speeds remain exactly the same (unlike ADSL and Fibre Broadband).

Immediate

The OneFibre circuit comes ready installed and can go live within 24 hours of placing an order.

Choice

With flexible contracts from 12 months to 5 years, you get to make the decisions.

Security

OneFibre is compatible with all business firewalls and can work flexibly with your network setup. Security is built in as standard, with the added option of a managed firewall service and wireless network.

Reliability

OneFibre lines are true fibreoptic cable, which doesn't suffer from the electrical interference associated with copper lines. Our service also comes with higher-grade hardware, making a huge difference to reliability.

Future Proofing

We use the latest technology to stay ahead of the game, so you can too.

24/7 Support & SLA

We guarantee 99% uptime and a 6-hour fault fix turnaround. And because we believe in the personal touch, we offer expert business support should you have any questions.

Round the clock monitoring

Prevention is always better than cure, so we'll keep a constant eye on things to make sure they're ticking along nicely.

Put simply, we provide you with enterprise grade internet and ensure the move to your new offices runs smoothly. No downtime, no unnecessary costs - just a happy, productive workplace from the word go.

For more information on OneFibre Internet please email us at info@onefibre.co.uk or call us on 020 3935 0179.
