03 Conceptual Floor Plan & Demising

Conceptual only — not to scale. Areas, dimensions, entrances and field conditions require verification.

The Building

The building is delivered as an open, adaptable 4,500± SF floor plate with long frontage on 16th Street and additional frontage along W Street. Interior finishes are clean and neutral, with high ceilings, natural light and a **roll-up glass door** — well suited to a single user or to a multi-suite configuration.

Flexible demising potential. Multiple existing entrances and an open floor plate allow the building to be occupied whole or divided into separate suites. The plan shown reflects one concept — Suite A and Suite B fronting the building, with the balance held as a single main space. Suite areas have not been measured; any demising configuration is subject to field verification, City of Sacramento permitting and building-code review.
