SITE PLAN

MARKET INSIGHT

Strathearn Heights is a centrally located, established neighbourhood in southeast Edmonton with a projected population growth rate of approximately 5%. The area demonstrates strong purchasing power, with an average household income of \$101,569 and 31.6% of residents between the ages of 20 and 39 — a key demographic for food and beverage, personal services, and convenience-oriented retail.

The neighbourhood is well serviced by public transit, anchored by the Valley Line Southeast LRT with stops along 95 Avenue and 85 Street. The Strathearn LRT stop, located directly south of the new development, provides direct connectivity to downtown and the broader city.

The site also benefits from exposure and connectivity via Connors Road, which carries approximately 15,134 vehicles per day (VPD). This arterial linkage supports both neighbourhood and pass-by traffic, positioning the site to capture local demand while maintaining city-wide accessibility.

We believe the Strathearn Heights development is coming available at the right time. It addresses a commercially under-served residential node and creates an opportunity to introduce needed retail and services. It also generates additional on-site clientele through its mixed use design.
