## ABOUT US

**Our family** has been active in the real estate industry for decades, through the ownership and operation of over one million square feet of select office, residential and mixed-use properties throughout the New York City metropolitan area. We know that finding first-class, affordable office space can be a challenge – whether you are a large blue-chip corporation or a small technology startup, especially in a bustling metropolis like Manhattan.

However, we never actually realized how painstakingly difficult it could be to locate impressive, short-term and fully furnished office space until Max, a close friend of ours and the vice president of a Los-Angeles based consulting firm, approached us. He was looking to seamlessly expand into the New York market, without incurring overhead costs or having to negotiate a traditional longterm lease. After conducting a thorough search, Max came back to us empty-handed. The business centers he visited were old, worn out and simply obsolete. The time came for a new age in executive business centers. And at that moment, Jay Suites was born.
